Surf & Podium Isles

In the Swedish city of Halmstad, the Ernst Wigforss Plats has been transformed from a car park into an inviting urban plaza. With the Municipality of Halmstad and Teutsch landskapsarkitekter, Streetlife collaborated on the project by supplying striking Solid Surf Isles and Solid Podium Isles. Due to the poetic and architectonic qualities of this extraordinary square, the design was awarded the annual Byggnadsnämndens Architecture Prize.

Solid Series by Streetlife

Streetlife is a design driven company with a passion for creating innovative design elements for public spaces. We create products that are natural in style and use the landscape as a starting point of design process. Every day we experience the synergy by working closely together with landscape architects.

Besides our well-known Rough&Ready Range (based on 7x15cm/3"x6" wooden beams) we offer the Solid Series as the slender collection with beams sized 7x7cm/3"x3". This Serie offers its own range of products, with its own touch, feel and '*minimal*' look. A strong coherence is created by using one Solid timber size for different product types.

In the centre of this brochure, you will find the fluor booklet, highlighting the newest Solid Serie Products for 2016-2017. Please do not hesitate to contact us for more information about our products or technology. Our team of architect advisors is experienced and technically skilled. They speak many languages and are enthusiastic to work with you!

Solid 12 Benches

Solid Benches 12

Leiden (NL)

EN

Solid 12 Benches have a strongly understated design. Both the wooden seat and the steel supports have a sturdy look. The FSC® hardwood slats are mounted into Streetlock® comb fittings. The gap width between slats is only 8mm (0.3”), giving the bench its closed (solid) appearance. With its rounded shape, the Soft Back provides more comfortable back support compared to the Quatro Back. As a result, the Quatro Back is often seen more as a divider.

FR

L'allure des Bancs Solid 12 exprime design réservé. Tant leur assise en bois que leur piètement en acier ont un caractère fermé et solide, d'où le nom du programme. Les lames en bois dur FSC® sont montées dans despeignes Streetlock® et séparées par des interstices de seulement 8mm de largeur. Le dossier Soft Back a une forme plus douce et offre un appui lombaire plus agréable que le Quatro Back. Ce dernier est d'ailleurs davantage utilisé comme élément diviseur.

DE

Die Formgebung der Solid Bänke ist sehr subtil. An der gut 90cm breiten Solid-Bank mit 12 Latten kann in der Mitte eine niedrige Quatro-Rückenlehne mit 4 Solid-Latten oder eine rundgehobelte Version befestigt werden: Soft Back. Die strenge Rückenlehne unterstreicht den ‚minimalistischen‘ Charakter der Solid-Bänke. Die Soft Back hat eine weichere Form und bietet dadurch eine angenehmere Stütze für den Rücken als die Quatro Back. Die Quatro Back gilt deshalb in der Regel auch eher als ‚Trennelement‘.

NL

De Solid 12 Banken hebben een sterk terughoudende vormgeving. Door hun maatvoering zijn de banken geschikt om aan twee zijden te zitten. Zowel het houten zitvlak als de stalen jukken hebben een gesloten (solid) karakter. De FSC® hardhouten latten worden gemonteerd in Streetlock® kammen, waarbij de spleetbreedte tussen de latten slechts 8mm bedraagt. De Soft Back rugleuning heeft een zachtere vorm en geeft een prettigere rugsteun in vergelijking met de Quatro Back. De Quatro Back wordt dan ook veelal gezien als 'divider'.

Solid Base Bench with Quatro Back
SOL-BAS-S120 + SOL-BAS-180-75

Solid Base Benches

With the Solid Base Benches the Solid slats are laid crosswise. The base construction is made of shot-blasted aluminium or galvanized steel. The attractive finish of the bases and their combination with warm, FSC® hardwood makes the benches suitable for making inconspicuous way finding arrangements in various configurations; available in square or elongated versions.

Love Tubs RVS
LTUB-S155-110-ST, 155x155x110cm
available in diverse sizes & heights

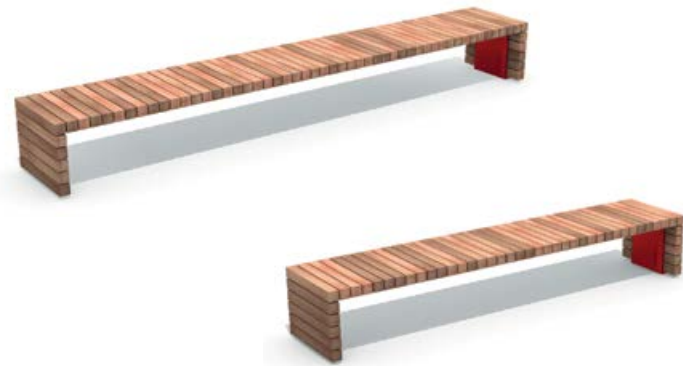

The Solid Love Benches are simple, low benches, with a noble appearance. Particularly attractive for rooftops and private residential areas due to their lightness in weight and aesthetic. The FSC® hardwood slats are mounted in our Streetlock® comb system, leaving a space between the slats of only 8mm - 0.3". These Solid Love Benches can be perfectly combined with our stainless steel Love Tubs.

Solitude Benches

Åndalsnes (NO)

EN

The Solitude Bench is a streamlined bench with an optional short, curving backrest. The high backrest is pleasantly comfortable. Solitude Benches are beautifully detailed and ideal for architectural gardens. If desired, the benches can be anchored to the surface with concealed attachments. The backrest makes for an exciting shape and the ergonomic support is truly superb. The supports are available in CorTen steel or shot-blasted aluminium and are rounded on the inside.

FR

Le Banc Solitude est un banc au «look» strict avec, en option, un dossier court ondulant. Le dossier haut garanti un bon confort d'assise. Les Bancs Solitude aux détails élégants conviennent aux jardins architecturaux. Si besoin est, les bancs peuvent être fixés au sol de façon invisible. La structure du dossier n'a pas seulement une forme intéressante, mais le soutien ergonomique est également excellent. Les supports sont en acier CorTen ou en aluminium brossé mat et sont arrondis à l'intérieur.

DE

Die Solitude Bank ist eine straff linierte Bank mit einem gewölbten kurzen Rücken (optional). Der hohe Rücken sorgt für einen angenehmen Sitzkomfort. Die Solitude Bänke haben eine feine Detaillierung und zum Einsatz bei architektonische Gärten geeignet. Die Bänke können bei Bedarf verdeckt am Boden verankert werden. Die Ergonomische Rückenlehne zeichnet sich in ihrer spannenden Formsprache aus. Die Gestelle sind aus Cortenstahl oder aus matt sandgestrahltem Aluminium und an der Innenseite abgerundet.

NL

De Solitude Bank is een strak ogende bank met een welvende korte rug als optie. De hoge rug creëert een aangenaam zitcomfort. De banken zijn fraai gedetailleerd en geschikt voor architectonische tuinen. De banken kunnen zo nodig op verdeckte wijze aan de ondergrond bevestigd worden. De rugconstructie is niet alleen spannend van vorm, de ergonomische ondersteuning is voortreffelijk. De jukken zijn van CorTen staal of mat gestraald aluminium en lopen rond aan de binnenzijde.

EN

Solid Serif Benches combine a seat made of Solid slats with a Rough&Ready locking beam (7x15cm - 3"x6"). The spacious benches can be equipped with a beautifully designed double backrest that provides excellent ergonomic support for both shorter and taller people. The generously dimensioned benches can be extended as desired. The supports are made of thick-walled CorTen steel and can be optionally finished in an RAL-coating.

FR

Les Bancs Solid Serif assortissent une assise en lattes Solid à une latte d'embout R&R (7x15cm). Ces larges bancs sont dotés d'un double dossier joliment conçu et offrent un excellent soutien ergonomique pour les personnes aussi bien petites que grandes. Ces bancs largement dimensionnés peuvent être couplés à l'infini. Les supports sont en acier CorTen épais et peuvent être, en option, laqué en couleur RAL.

DE

Bei den Beethoven Bänke wird die Sitzfläche aus Solid-Latten von einem R&R-Balken abgeschlossen (7x15cm). Die breiten Bänke können mit einer doppelten Rückenlehne ausgestattet werden, die sowohl für größere als auch kleinere Personen ergonomischen Halt bietet. Die großzügigen Bänke lassen sich je nach Wunsch kombinieren. Gestelle werden aus dickwandigem CorTen-Stahlblech gefertigt und können wahlweise in RAL-Farbe pulverbeschichtet werden.

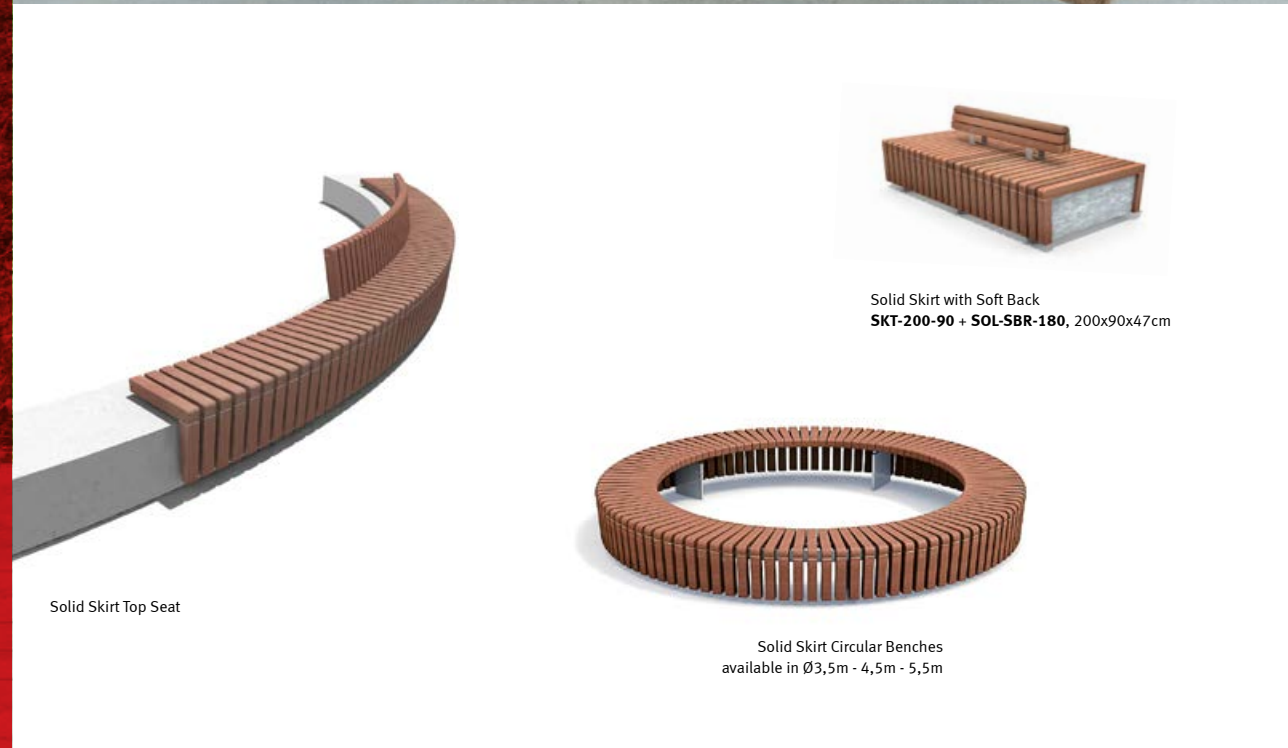

NL

De Solid Serif Banken combineren een zitvlak van Solid latten met een Rough&Ready slotbalk (7x15cm). De brede banken zijn te voorzien van een dubbele rugleuning die esthetisch is vormgegeven en een uitstekende ergonomische ondersteuning geeft voor zowel lange als kleinere mensen. De royale banken zijn naar wens door te koppelen. De plaatjukken zijn vervaardigd uit dikwandig CorTen plaatstaal en optioneel te voorzien van een RAL coating.

Solid Edge System

Philadelphia (USA)

EN

The Solid Edge System is a simple way to create higher borders with Solid seats. It makes for a pleasant spot to sit shaded by the accompanying greenery. The steel base structure is available RAL-coated or in CorTen. The front wall slopes back steeply to create leg space. Side walls or as an extension of the seating edges are optional. The sturdy hardwood slats are mounted from above using Streetlock® comb fittings.

FR

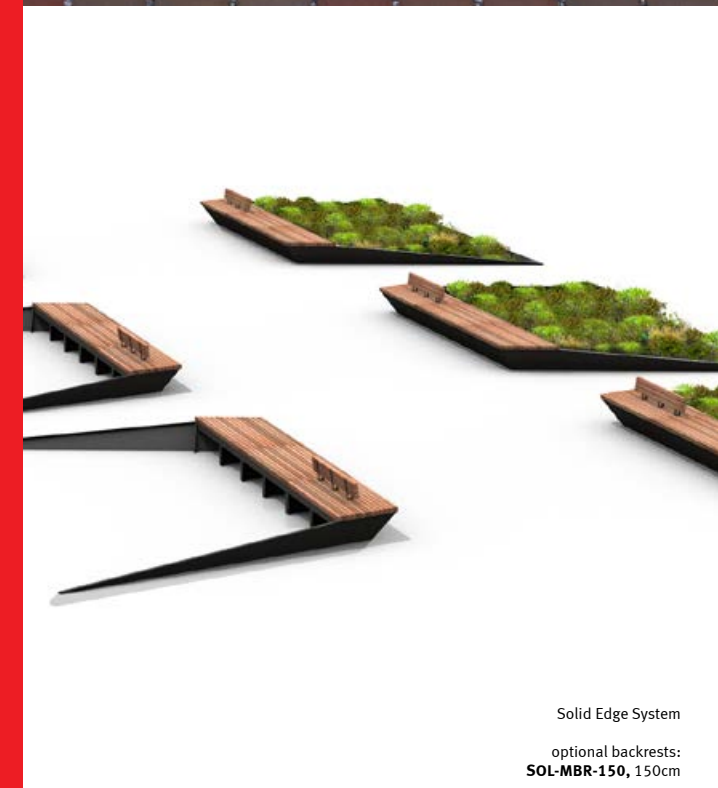

Le Système Solid Edge permet de créer facilement des bordures surélevées pouvant être dotées d'assises Solid. On s'y sent bien, d'autant que les arbres et arbustes plantés derrière soi propagent une ombre bienfaisante. La structure portante est disponible en acier CorTen ou en acier thermolaqué dans un coloris RAL. La face avant de l'élément a un profil vertical oblique (qui se rétracte à mesure qu'il se rapproche du sol) afin d'offrir plus d'espace pour les jambes. Des éléments de coin ou situés dans le prolongement du bord d'assise sont disponibles en option. Des lames de bois dur sont fixées dans des peignes Streetlock®.

DE

Mit dem Solid Edge System lassen sich auf ganz einfache Weise erhöhte Blumenbeete mit Solid Sitzflächen gestalten. Eine grüne Pflanzfläche im Rücken macht den Aufenthalt noch angenehmer. Die Unterkonstruktion aus Stahl ist RAL-beschichtet oder in einer Cortenstahl-Ausführung lieferbar. Die Front ist abgeschrägt, um mehr Beinraum zu schaffen. Seitenwangen oder als Verlängerung des Sitzrandes sind optional lieferbar. Die robusten Hartholz-Latten werden in Streetlock® Kämmen an der Oberseite montiert.

NL

Met het Solid Edge Systeem creëert men op eenvoudige wijze verhoogde borderlijnen met Solid zitvlakken. Het is aangenaam vertoeven met een groen plantenvak in de rug. De stalen onderconstructie is RAL-gecoat of in CorTen verkrijgbaar. De voorwand loopt schuin weg om beenruimte te creëren. Zijwangen of in het verlengde van de zitrand zijn optioneel te leveren. De Solid Top Seats hardhouten latten in Streetlock® kammen worden aan de bovenzijde gemonteerd.

SOL-MBR-150, 150cm

NEW

Solid Series New Products

Streetlife Solid Series

EN

The products in the Solid Series have a solid character. The product family includes benches, picnic tables, bicycle racks, podiums, tree planters, fencing and pedestrian and cycle bridges.

- The Solid identity is modest and minimal in terms of design.
- The steel support and structure are closed and therefore solid in their form.
- As a result of consistent detailing based upon the **7x7cm/2.8"x2.8"** hardwood beams and their spacing, there is a strong interdependence between all the Solid products.

FR

Tous les produits de la Série Solid ont une apparence solide. La famille de produit comprend bancs, sets de pique-nique, appuis-vélo, podium urbains, bacs à arbre, garde-corps et passerelles piétonnes et cyclistes.

- L'identité Solid est restreinte avec un design «minimaliste»
- La structure métallique portante et pieds de bancs sont de forme solide et fermée.
- Dû à l'application constante de la section de bois de **7x7cm** et un espacement restreint, une forte identité mutuelle entre les produits Solid est créée.

DE

Alle Produkte der Solid Serie haben eine solide Ausstrahlung. Zur Produktfamilie gehören Bänke, Tische, Fahrradständer, Sitzpodeste, Baumkübel, Zäune, Fußgänger- und Fahrradbrücken.

- Die Solid Identität weist ein zurückhaltendes und minimalistisches Design auf.
- Die Stahlunterkonstruktion und Bankgestelle zeichnen sich durch eine solide und geschlossene Bauweise aus.
- Durch die konsequente Anwendung des Holzmaßes von **7x7cm** und einer schmalen Spaltbreite ist ein großer Zusammenhang der einzelnen Elemente der Solid Produkte untereinander zu erkennen.

NL

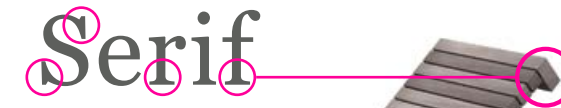

Alle Producten van de Solid Series hebben een solide uitstraling. De productfamilie omvat banken, picknicksets, fietsbeugels, stadspodia, boombakken, hekwerken en fietsbruggen.

- De Solid identiteit is terughoudend en "minimal" qua design.
- De stalen onderconstructie en bankjukken zijn gesloten van vormgeving.
- Door de consistente toepassing van de houtmaat **7x7cm** en een nauwe spatiëring is er een sterke onderlinge samenhang van alle Solid producten.

Solid Top Seats

Solid Top Seats are linkable modules made of FSC® hardwood that are mounted onto a stone or sheet metal base. Their FSC® hardwood slats (7x7cm - 2.8"x2.8") are sturdy and solid. The seat can be invisibly installed onto the base structure using the patented Streetlock® comb-system.

Solid Staple Benches

Solid Staple Benches have a slender design, but have a powerful architectural impact. The colour variations in the high-quality FSC® hardwood create a beautiful texture that appeals to everybody. The steel supports are anchored to the ground with concealed attachments.

Serif refers to a term in typography that distinguishes between letters with a small line at the end of the main stroke of the letter (the serif) and those without a line (sans-serif).

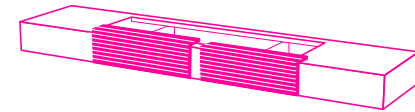

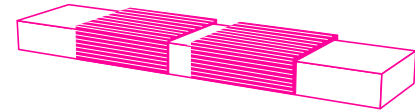

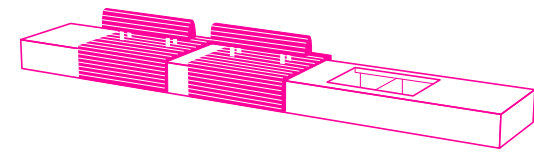

Solid Serif Chaise Longue

The **Solid Serif Chaise Longue** has an appealing wave shape. It is a recliner that is perfect for relaxing in the sun. It is finished with two broad, sturdy beams – the Solid Serifs. The Chaise Longue has a floating effect above grass.

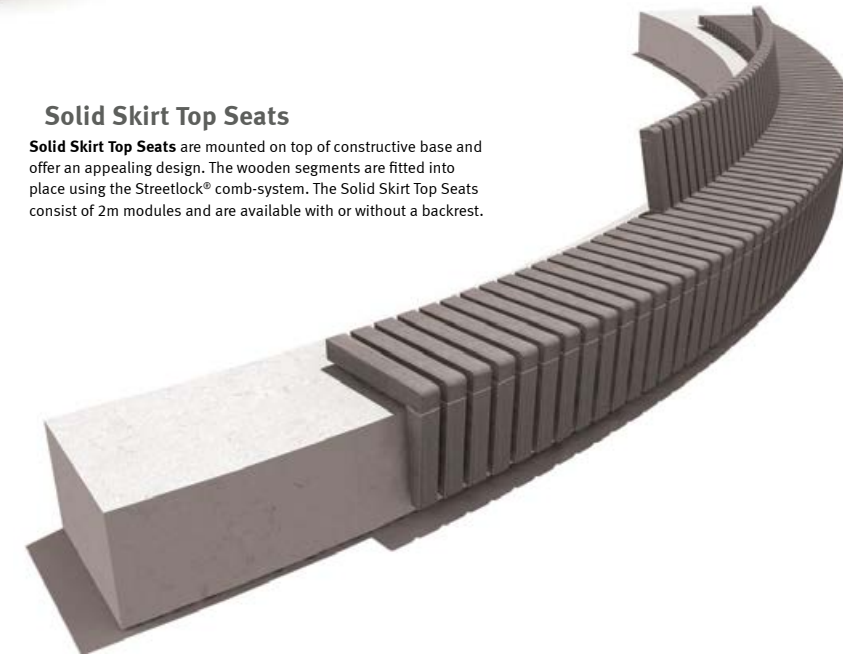

Solid Seat Blocks

Solid Seat Blocks are sturdy design elements that allow benches, planters and tree boxes to be combined in a variety of appealing ways while offering double-sided seating. The RAL-coated and CorTen modules can be seamlessly connected, creating an orderly and harmonious low-maintenance urban landscape design. The Solid Seat Blocks have a recessed plinth. The short Solid Softback backrest model is available as an optional add-on.

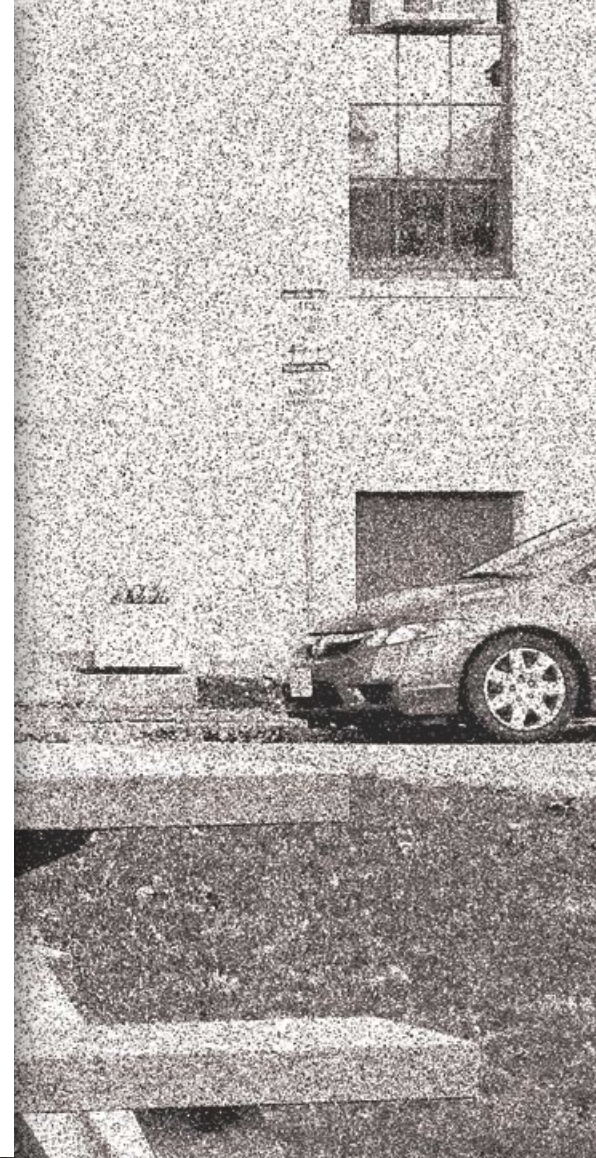

Solid Skirt Top Seats

Solid Skirt Top Seats are mounted on top of constructive base and offer an appealing design. The wooden segments are fitted into place using the Streetlock® comb-system. The Solid Skirt Top Seats consist of 2m modules and are available with or without a backrest.

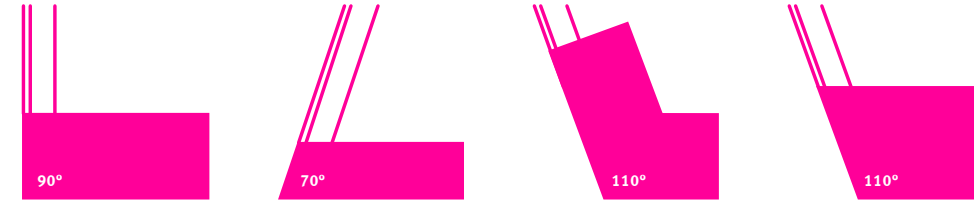

Solid San Marco Seats

Solid San Marco Seats are single-block low benches which are installed with a separate console flush with the ground. The design was inspired by centuries-old stone benches in Venice (Italy). The CorTen frame can also be pre-rusted and then powder-coated with a transparent layer. The seating element of FSC® hardwood Solid slats is optional.

Solid Terrace Curve

The **Solid Terrace Curve** is a striking element allowing for the creation of recreational spaces with excellent seating capacity in flexible formations. The base structure comprises modular CorTen steel components. Dimensioning is project-based and carried out in collaboration with the client's specifications.

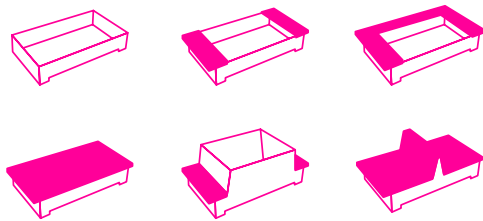

Solid Edge Isles

The **Solid Edge Isles** are elegant elements for using to introduce emerging landscapes in public space. Our Solid Topseats can be combined with the isles to make a variety of seating configurations. The striking sloping steel sheet border makes provisions for more leg room under the seat itself. Available in 234x234cm or 300x300cm.

Solid Edge System

The **Solid Edge System** is a simple way to create higher borders with Solid Top Seats. The steel base structure is available RAL-coated or in CorTen. The front wall slopes back steeply to create leg space. Side walls at minimal 70° to maximal 180°. The Solid Top Seats are available with 6, 8 or 12 slats. The sturdy hardwood slats are mounted from above using Streetlock® comb-fittings.

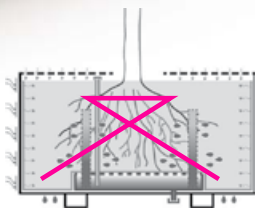

Mobile Green Isles

The **Mobile Green Isles** are moveable rectangular planters with integrated hardwood seats. Their basic structure is fabricated from sheet steel. With the modular elements of 3m (10") an infinite amount of designs can be created. Seating can be installed alongside or end faces using Solid Topseats made from FSC® hardwood slats.

Solid Grille Benches

People like to sit near trees. The **Solid Grille Bench** is a squared tree grille combined with a seat. Solid Grille Benches are available with both straight and diagonal ends for large tree grilles. The heavy gauge CorTen steel supports are fitted to the size of the tree grille.

Solid Planter Serpentine

Solid slats have been placed vertically on the **Solid Planter Serpentine**. The FSC® hardwood Solid slats form a robust, characteristic edge on the top end of the tub. The facilities for the Tretec® Bottom Up System have been beautifully integrated with the composite inner tub. The Solid Planter is also available in round and square designs.

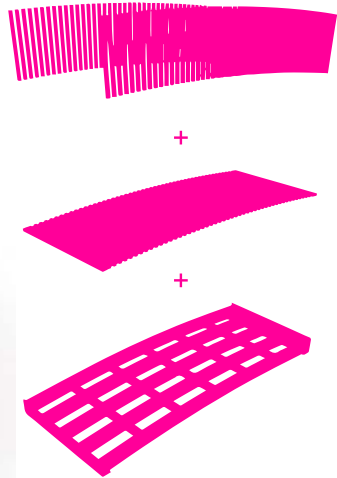

Solid Bicycle Racks

Solid Bicycle Racks are basic lean-support racks fitted with a sturdy wooden top beam and a lot-shaped opening for bicycles to be secured with a cable or chain lock. The untreated and sustainable FSC® hardwood prevents damage to the bicycle and creates an inviting image. The steel strip is available in galvanized or powder-coated options.

Solo All Wood Bridges

Solo All Wood Bridges consist of treated European wooden girders, FSC® hardwood posts and decking. Solideck® 70 is mounted onto a wooden support structure made of composite Glulam girders. The Solid beams that comprise both the bridge deck and fencing fit into each other perfectly.

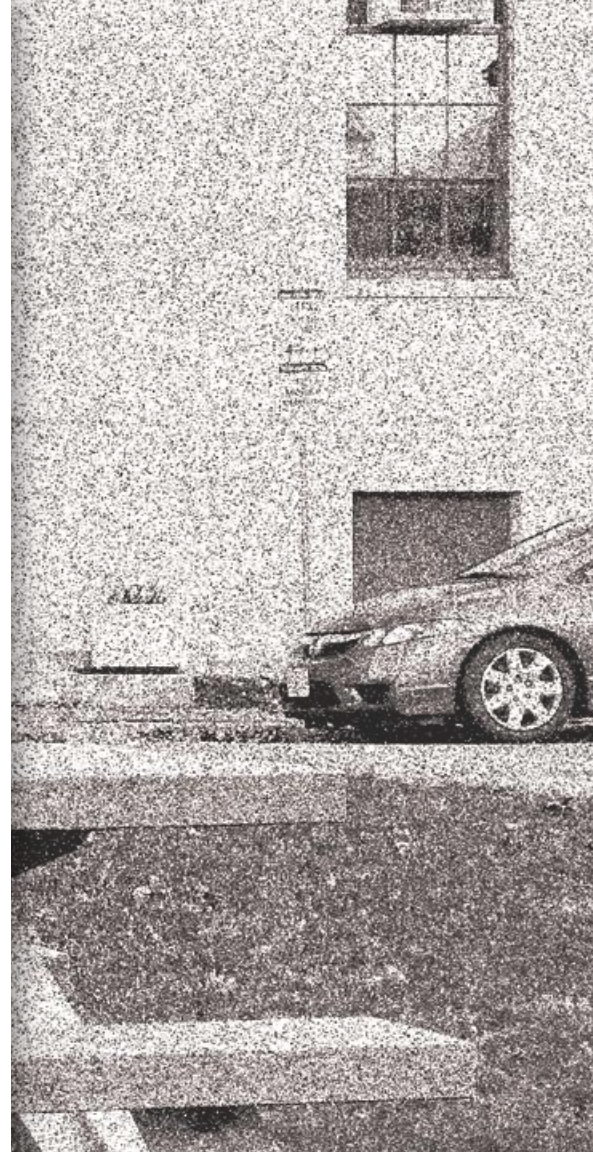

Custom Jetties

Waterways are increasingly attracting urban development projects. Boulevards and open water provide cooling rest and recreational areas amid the bustling city. In addition to Floating Jetties, Streetlife also creates **Fixed Custom Jetties** in any of Streetlife's decking materials.

Floating Jetties Curved

Streetlife is introducing a system of **Floating Jetties** in both Curved and Straight models. The jetties are fitted with FSC® hardwood Solideck®70 decking, making them the perfect match for Solid Crosswise Benches. The **Floating Jetties system** uses modules made of aluminium and filled with 80% foam. The floating modules are then hinged together and the jetty structure is stabilised on poles.

Solid Seat Strip

Duisburg (DE)

Solid Seat Strips & Green Benches

Feuquières en Vimeu (FR)

EN

Solid Seat Blocks are sturdy design elements that allow benches, planters and tree boxes to be combined in a variety of appealing ways. Contrary to the narrow Solid Seat Strips, Solid Seat Blocks are wide elements offering double-sided seating. The RAL-coated or CorTen modules can be seamlessly connected, creating an orderly and harmonious low-maintenance urban landscape design. The Solid Seat Blocks have a recessed plinth.

FR

Les Solid Seat Blocks sont d'imposants éléments d'aménagement qui permettent de combiner des assises encastrées, des jardinières et des bacs à arbre d'une façon attrayante. À la différence des Solid Seat Strips, qui ont un profil étroit, les Solid Seat Blocks ont une largeur. Ils peuvent donc accueillir des assises de part et d'autre. Les éléments en acier CorTen ou en acier thermolaqué dans un coloris RAL peuvent être couplés de façon invisible. Ils donnent aux espaces urbains un aspect ordonné et dynamique, tout en réduisant l'entretien au minimum. Les Solid Seat Blocks sont dotés d'une plinthe en retrait.

DE

Die Solid Seat Blocks sind robuste Einrichtungselemente, bei denen integrierte Sitzbänke und Grünpflanzen sowie Baumkübel auf ansprechende Weise mit einander kombiniert sind. Während die Solid Seat Strips schmal sind, handelt es sich bei den Solid Seat Blocks um breite Elemente mit beidseitiger Sitzmöglichkeit. Die RAL-beschichteten oder CorTen-Module können unsichtbar an einander befestigt werden. Dadurch entsteht ein geordnetes und ausdrucksstarkes Straßenbild, für das der Wartungsaufwand auf ein Minimum reduziert ist. Die Solid Seat Blocks haben eine nach hinten versetzte Leiste.

NL

De Solid Seat Blocks zijn forse inrichtingselementen waarbij geïntegreerde zitbanken en groene planten en boomvakken op aansprekende wijze gecombineerd zijn. In tegenstelling tot de smalle Solid Seat Strips zijn de Solid Seat Blocks brede elementen met tweezijdige zit. De RAL-gecoate of CorTen modules kunnen onzichtbaar door geschakeld worden. Hierdoor ontstaat een geordend en krachtig straatbeeld, waarbij onderhoud tot een minimum is gereduceerd. De Seat Blocks hebben een terugliggende plint.

Solid Meet&Work System

Oslo (NO)

Configurations of Solid Meet&Work System

EN

Endless layout variations are possible with the various Solid Meet&Work landscaping elements. This high-quality system is for example ideal for the outdoor area of a large office complex. Flexible workstations and meeting areas can be combined with sustainable greenery. The tree planters are suitable for full-grown trees (4 to 6m -13 ft to 20 ft) that can provide shade.

FR

Les différents éléments d'aménagement de Solid Meet&Work permettent de créer de nombreuses structures. C'est un système idéal et de haute qualité pour les alentours des grands immeubles de bureaux. Environnements de travail temporaires, lieux de réunion et points de rencontre assortis à des espaces verts durables. Les bacs à arbre professionnels peuvent contenir des arbres adultes (4 à 6 mètres) en mesure de procurer de l'ombre.

DE

Mit den verschiedenen Solid Meet&Work Einrichtungselementen sind zahllose Konfigurationen möglich. Es ist ein ideales und hochwertiges System, zum Beispiel für den Außenbereich eines großen Bürogebäudes. Flexible Arbeitsplätze, Besprechungsbereiche und Begegnungsorte kombiniert mit nachhaltiger Begrünung. In den Baumkübeln können vollwertige Bäume (4 bis 6 Meter) als Schattenspender gepflanzt werden.

NL

Met de verschillende inrichtingselementen van Solid Meet&Work zijn tal van opstellingen mogelijk. Het is een ideaal en hoogwaardig systeem voor bijvoorbeeld het buitengebied van een groot kantoorpand. Flexwerkplekken, vergaderplekken en ontmoetingspunten worden gecombineerd met duurzaam groen. In de professionele boombakken zijn volwaardige bomen (4 à 6 meter) te plaatsen voor schaduwwerking.

Solid Tree Planters

EN

Solid slats have been placed vertically on the Solid Tree Planters. The FSC® hardwood Solid slats form a robust, characteristic edge on the top end of the tub. The facilities for the Treetec® Bottom Up System have been beautifully integrated with the composite inner tub. Available in round and square designs up to an impressive dimension of 250x250cm - 98"x98" with a substrate volume of approximately 4m³ - 141 cu ft.

FR

Parmi la gamme de produits Solid, nous avons les Bacs à Arbre Solid, avec des lattes du même nom de 7x7cm positionnées à la verticale. Le bac intérieur en matériaux composite peut-être associé avec le système Treetec® Bottom Up. Les modèles sont disponibles en rond ou carré, jusqu'à 230x230cm avec un volume de substrat de croissance de ca. 4m³.

DE

Bei den Solid Baumkübeln sind die Solid-Latten vertikal angebracht. Die Solid Baumkübel unterscheiden sich durch den charakteristischen Rand aus Solid Latten. Im Komposit-Innenkübel sind die Vorrichtungen für das Treetec® Bottom Up System bereits integriert. Möglich in runder, oder auch in viereckiger Ausführung, von bis zu 250x250cm mit einem Fassungsvermögen von ca. 4m³.

NL

Bij de Solid Boombakken zijn Solid latten verticaal aangebracht op composiet binnenbakken. De forse Solid latten van 7x7cm vormen aan de bovenzijde een solide en kenmerkende rand. In de composiet binnenbak zijn voorzieningen voor het Treetec® Bottom Up Systeem fraai geïntegreerd. Zowel verkrijgbaar in ronde als vierkante uitvoeringen tot maar liefst 250x250cm met een groeimedium volume van ca. 4m³.

Solid Tree Planter Round
SOL-PL-D220-81, Ø220x81cm, ± 2,2m³

Solid Tree Planter Squared
SOL-PL-S150-90, 150x150x90cm, ± 1,3m³

Solid Tree Planter Squared
SOL-PL-S200-90, 200x200x90cm, ± 2,7m³

Solo Fences

EN

The Solo Fence consists of vertically positioned Solid hardwood slats of 7x7cm - 3"x3", which results in a fascinating image. The fence can be placed in a clean, straight line. However, a curve or rounded corner can also be beautifully realised by mounting the fence onto a laser-cut, three-dimensional comb solution. A stainless steel handrail can be optionally included.

FR

Le Grillage Solo se compose de lattes en bois dur Solid de 7x7cm placées verticalement et crée ainsi un aspect fascinant. Le grillage peut être disposé en une ligne droite sobre. Cependant, toute courbe ou tout angle rond peut aussi être magnifiquement réalisé par un montage sur un peigne 3D découpé au laser. Une main courante en acier inoxydable est disponible en option.

DE

Das Solo Geländer bestehen aus vertikal montierten Solid Hartholzlaten von 7x7cm, wodurch ein faszinierendes Bild entsteht. Das Geländer kann in gerader Linie montiert werden. Durch die Montage auf den lasergeschnittenen 3D-Kamm lassen sich auch beliebige Krümmungen oder Ecken realisieren. Wahlweise kann ein Handlauf aus Edelstahl zugefügt werden.

EN

Het Solo Hekwerk bestaat uit verticaal geplaatste Solid hardhouten latten van 7x7cm hetgeen een fascinerend beeld oplevert. Het hekwerk kan in een strakke rechte lijn opgesteld worden. Echter ook elke kromming of ronde hoek is prachtig te realiseren door montage op een lasergesneden 3D-kam oplossing. Optioneel is een RVS-handreling op te nemen.

Solo Bridges

Solo Bridges have a clean-lined, contemporary look that sets off their quality detailing. These bridges are surprisingly versatile. Streetlife has four different Solo Bridge Types in the Collection. Solo Bridges give landscape architects plenty of freedom to create a variety of effects and enhance their vision.

The Streetlife Collection
